

Drilling Data Acquisition

Monitor Systems in association with **BOHR Instrument Systems BV**, supply, install and commission the **Drill-Pro Total Drilling Information System (TDIS)**. **Monitor Systems** has been a distribution partner for **BOHR** since 1998 providing system sales, installation and support, factory trained technicians, including spares and consumables.

Drill-Pro (Drilling Data Acquisition Systems) provides accurate up to the minute information on critical drilling parameters during drilling operations, tripping and other mud sensitive activities. Drill-Pro supplies drilling personnel with important drilling data in a compact 19" TFT monitor unit.

Capital Sale or Rental of Systems is offered.
